Subject: Humanity version 2.0

Dear NAME,

This letter is to make you aware of some announcements that are being planned globally. It is about a step change that can stop war. This is hugely ambitious but before broadcasts there will be 2 billion people ready to implement this initiative. Those in power had feared this. But many are amenable to this model. The rich still get much richer, but the workforce does much better.

It was only a matter of time before social media achieved this. This is connecting everyone who is thinking the same. When this goes public it could be looked upon as a “world coup” that nobody wants to stop. There will be very few people fearing it.

Many that would be expected are already engaged. Some now as founders. Until these announcements, everyone is working under NDA. As you benefit you may also wish to participate. We propose a confidential relationship with you. We can introduce you to those already involved and professionals inside many of the large accounting firms.

Can we please arrange a call to discuss your profiting from this?

Yours sincerely,
